# MISSIONCRAFT IN DISASTERS & AUSTERE ENVIRONMENTS

*Providing Quality Acute Care in  
Limited Resource Settings*

**MISSIONCRAFT IN DISASTERS AND AUSTERE ENVIRONMENTS** is designed to equip health care practitioners with advanced practical skills and knowledge in order to effectively provide **quality acute care in resource constrained environments**. This 4-day intensive course combines principles of *Missioncraft in Disaster Relief™* course with focused in-depth clinical training. The workshop is offered to health care professionals who plan to deploy and provide hands-on, acute care with limited resources. The course is designed for experienced professionals in pursuit of mastery and is not intended for medical tourists.

## Lead Faculty Experience

- Current specialty board certifications or specialty society fellowships in **clinical medicine and public health**
- Organizational experience as disaster medical coordinator or team leader for **governmental, non-governmental, United Nations, and Red Cross organizations**
- Field experience as disaster medical coordinator or health advisor in over **two dozen** countries on five continents
- Language fluency in **two** or more official UN languages

## Key topics

- Core austere **clinical care training and simulation**: acute disease, trauma, obstetrics, chronic disease, pediatrics
- Pre-departure preparation
- **Security** in complex environments
- Critical **public health topics** for clinical providers
- **Team** management
- Austere **ultrasound**
- Humanitarian **technology**

## Tuition includes

- **4 training days** with high faculty-student ratio
- Course materials
